ANALYSIS AND SOFTWARE DEVELOPMENT

Alejandro Rey Vera

Sheet: 2721414

Teacher: Maria Jose Quintana

¡HELLO!

My name is Alejandro Rey Vera, and I am a student
in the software analysis and development program
in the tab 2721414

I am a student, I worked in a company as a Systems
Assistant.

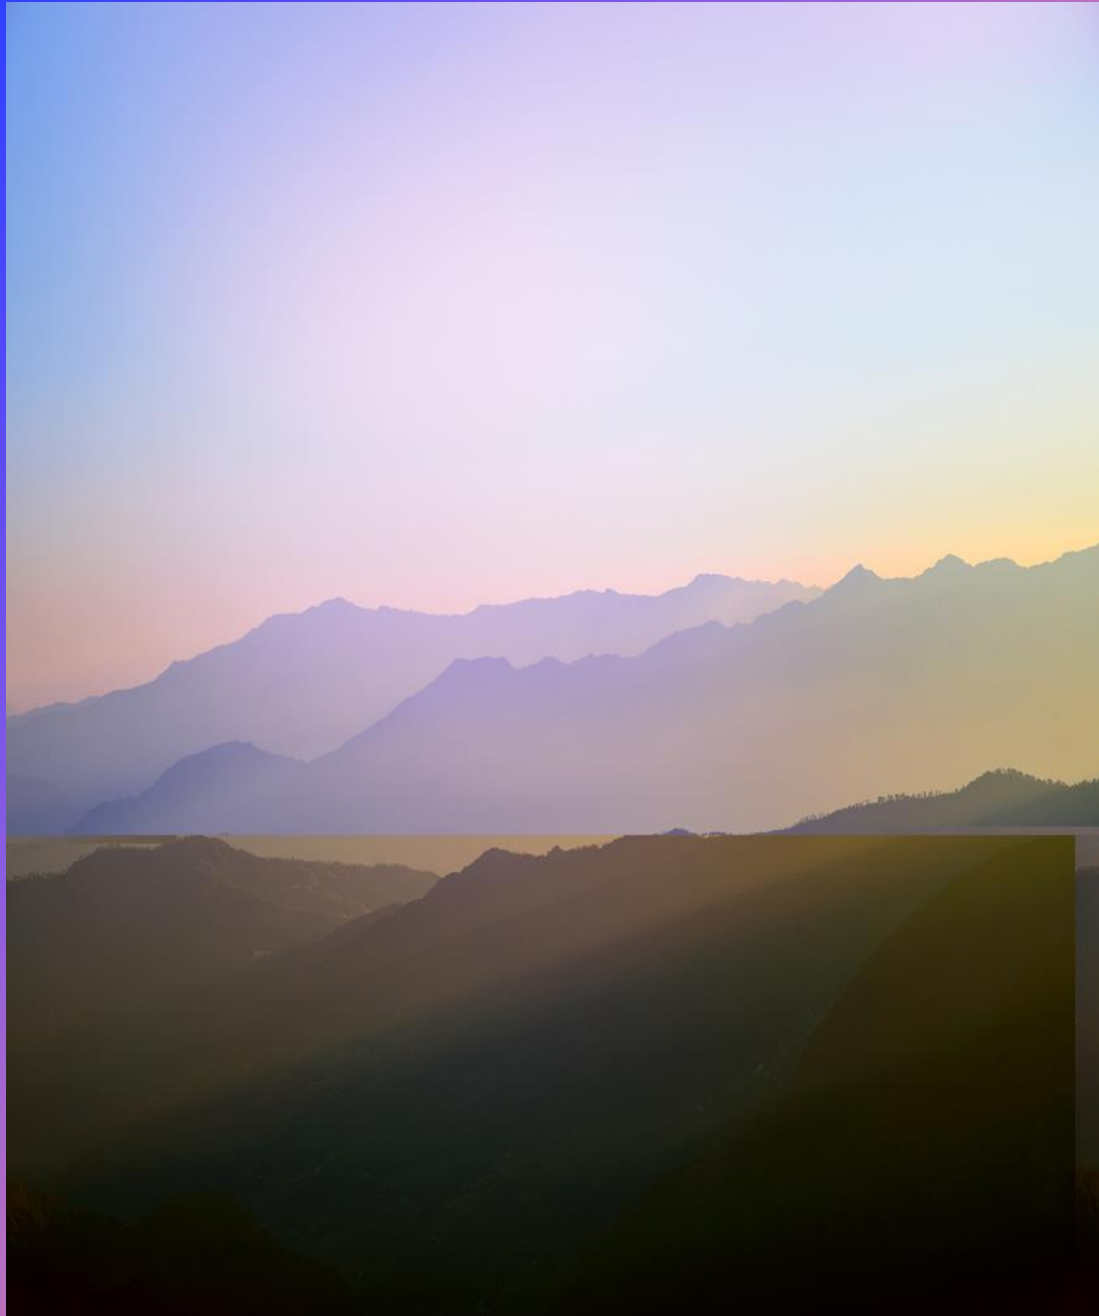

I study online, in some software development
programs.

If I studied in person, I could not because I belong
to many programs.

My Planning is

My plans is to be a developer and Systems Engineer or Software Engineer, think now finish my Technologist in software analysis and development.

My previous job

I performed very specific maintenance tasks and made good contributions to the company, I was very responsible, I was a fast learner, I like to do things well and I was assigned complex tasks that I achieved with success.

Things that motivate me

I like technology, I want to lead projects, create new ideas, platforms and give a change either personal or in the area of any technology problem and I really like to create, and I like programming a lot.

- If I keep studying I can have a good position.
- I'm punctual.
- If I don't study now I won't have better opportunities.
- I will achieve my higher education as soon as possible.
